**ELIGIBILITY REQUIREMENTS:** All applications must be completed by **Wednesday, March 2, 2022**. All applicants must be high school seniors or post-secondary students currently enrolled (at the time of application) in a collision repair program and must have been studying collision repair for at least one semester prior to applying for the awards. Students will be considered for all scholarships/tool grants that they are eligible for based on the individual eligibility factors of each award. These eligibility factors can include gender, school attending, year in school, future plans, outside activities, and/or financial need.

The collision instructor must complete the Collision Repair School Solutions Survey in order for his/her students to be eligible for any of the scholarship/tool grant opportunities. More details available at [CollisionEducationFoundation.org](http://CollisionEducationFoundation.org).
